

## Opening Speech by Dean of Faculty Marine Technology ITS

First of all, let us thank God, the Almighty, who has given His grace and guidance so that the International Conference on Marine Technology (SENTA) with the theme of Maritime Technology for Sustainable Development can be held successfully.

I welcome all of you to this seminar which has received great attention not only from university, but also from maritime world communities to submit papers to be presented in this seminar. I express my highest gratitude and appreciation the presenters. I believe that this seminar will be the source of innovative ideas, concepts, and breakthroughs in the development of marine technology in the future, especially in the field of sustainable development.

this seminar will not be well organized without the support of various parties, especially the sponsors and contributions from the participants. Therefore, I want to express my gratitude.

I especially thank the organizing committees for their hard work, perseverance, and patience in preparing and organizing this seminar so that it can go well, smoothly and successfully.

finally, through this seminar let us extend the network and cooperation among all stakeholders of the marine technology sector, especially in Indonesia and in the world in general, to build a better maritime world in Indonesia

Surabaya, December 6<sup>th</sup> 2017

Dean of Faculty Marine Technology ITS,

**Prof. Ir. Daniel M. Rosyid, Ph.D., M.RINA**
